

## NumWorks REACH SVHC Disclosure

The Registration, Evaluation, Authorization and Restriction of Chemicals Regulation EC 1907/2006, commonly referred to as REACH, is a European regulation on chemicals and their safe use. With the publication of candidate lists for authorization, the European Chemicals Agency identifies sets of substances of very high concern (SVHC) that manufacturers must disclose to customers if used in articles in their products above 0.1% by weight.

Based on the current version of the candidate list for authorization, NumWorks products contain the following SVHC above the disclosure threshold:

Lead in one single electronic component of the Numworks Graphic Calculator models Number N0120 and N0115

The application is exempted from EU RoHS requirements (Annex III, 7(c)-I)

The SVHC used in these products do not pose a safety risk to customers under normal use conditions.
